

STÄHLE GmbH Maybachstraße 12 71299 Wimsheim

Dear business partners,

In the context of the currently prevailing pandemic, we have had to accept all the restrictions and have managed to maintain our business activities up to now by adhering to the indicated regulations.

Now that we have survived the first wave of infections, visits by our technicians on site are increasingly being requested again. Of course, we are happy to comply with this request from our customers again.

We have imposed strict rules on our employees to ensure that we continue to come through this crisis free of infection. In addition to the general distance and hygiene rules, we also require the wearing of a mouth and nose mask to ensure the greatest possible protection for our employees and the employees of our business partners.

To ensure the greatest possible protection on site at your company, we would like to ask you to instruct your employees to wear mouth and nose masks if the work situation does not allow the necessary distance.

We have instructed our employees to ensure that they do not put themselves in a situation where our customers' employees work with them without a mouth and nose mask.

It is therefore important to us that you also instruct your employees to wear masks when working without sufficient safety distance.

If our employees find that the necessary safety measures are not observed by your employees, they are instructed to interrupt the work or even cancel the appointment altogether. We would like to draw your attention to the fact that in this case we will still charge you in full for the service.

We trust in your understanding and hope that we can prevent infection with the dangerous Covid19 virus by acting together and responsibly.

Kind Regards,

Stähle GmbH

-Managing Director-
